

## Mobility Element

**COMMUNITY OPEN HOUSE**  
January 30, 2010

Comments Worksheet

### Goals

- Create pedestrian-friendly facilities throughout the community with an emphasis on Cesar Chavez Parkway, 28th Street, the National Avenue/26th Street/Boston Avenue green street corridor, and Harbor Drive.
- Emphasize transit as a mode of choice for large employers in the Barrio Logan area including Port tenants and the Navy by enhancing transit service and infrastructure.
- Provide adequate capacity and improve regional access for vehicular traffic on heavily traveled roadways through focused improvements.
- Provide a safe bicycle network that connects community destinations and links to surrounding communities and the regional bicycle network.
- Develop and implement a parking management strategy that reduces the parking impacts associated with the Community College, Port and Navy facilities onto Barrio Logan streets.
- Delineate safe and efficient truck routes for access to San Diego Unified Port District industries as well as businesses within the Barrio Logan community that minimize the negative impacts associated with truck traffic.
- Partner with government agencies such as the San Diego Association of Governments (SANDAG), Caltrans, and the Port to identify and fund improvements needed to better serve regional access, goods movement and parking.

The goals for the Mobility Element reflect the community's input. (circle one)
